Title: Small Classes Big Impact: Maximizing Student Engagement

The college offers undergraduate courses such as BBA, BBA (CA), and BSc. (CS), each with an intake capacity of 80 students. With a class size of 80, it becomes challenging to address student queries and meet their enthusiasm within the limited lecture time. By reducing class sizes, i.e. dividing one division of 80 intakes into two classes of 40 each, college aims to provide greater attention to individual student needs, improve results and a more engaging educational experience.

This practice focused on student motivation and enthusiasm for learning. The objective involves investigating the role of technology and innovative teaching methods in optimizing engagement within smaller classrooms.

We have increased the student participations in all activities. The management also helps to provide adequate resources like faculties, infrastructure, budget allocation etc. to achieve the success.

Mentor and Mentee Allocation

Introduction:

Mentoring is a relationship between two people with the goal of professional and personal development. It is a relationship defined as helping and supporting students to "manage their own learning in order to maximize their professional potential, develop their skills, improve their performance, and become the person they want to be"

The "Mentor" is usually an experienced individual who shares knowledge, experience and advice.

Mentors become trusted advisers and role models – people who have "been there" and "done that." They support and encourage their mentees by offering suggestions and knowledge, both general and specific. The goal is to help mentees improve their skills and hopefully, advance their careers as and when possible.

The relationship between the Mentor and the Mentee (Faculty as the Mentor and the Student as the mentee) should be based on mutual trust and respect, and it offers personal and professional advantages for both parties.

Mentoring is a professional activity, a trusted relationship and a meaningful commitment.

Objectives of the Mentoring activity:

1. To help enable the newly joined students to get accustomed to campus life and the various programs of the Institute.
2. To facilitate the mentoring for poor performing students at any stage during their time at the Institute.
3. To help in the students' academic growth and identify career paths for them.
4. To help in supporting students' personal growth.
5. To provide an opportunity for students to learn and practice professional networking skills.
6. To equip students with the understanding of making ethical and informed decisions.
